

## KIDS DON'T FLOAT

First Southern has kicked off the first “Kids Don’t Float” display at Tottenville Marina on Staten Island. So far we’ve received many complements from our fellow boaters. The display is simple to put together. The dimensions can be altered to fit in almost any available space. Below are the materials, measurements and costs for the Tottenville Marina project.

- 2 8 ft 1<sup>1/4</sup> in. by 5in. marine planks. \$56.50
  - 10 Coated bike hooks.
  - 1 Box of stainless steel screws.
  - 1 Sign 15 in. X 36 in. \$47.00 (purchased at Fast Signs)
- Total cost:** \$103.50

These displays could potentially save the lives of many children. This is also great publicity (PA) for the Auxiliary. It would be wonderful if each Division could put at least one of these displays up in their area before the boating season ends.
